

REJIL RAJ PR

FULL-STACK SOFTWARE DEVELOPMENT ENGINEER

Chennai, Tamil Nadu, India | +91 9360215811 | rejilrajpr3@gmail.com | [linkedin.com/in/rejil-raj-pr](https://www.linkedin.com/in/rejil-raj-pr) | github.com/rejilraj

PROFESSIONAL SUMMARY

Full-Stack Software Development Engineer with 4+ years of experience building scalable web, mobile, AI, and IoT systems across React, React Native, Node.js, MongoDB, Python, and Azure. Built a real-time AI voice-interview platform (Three.js, LLM integration, live code execution) and a full-stack fintech platform spanning admin, customer, and staff applications. Cut API latency by 50% and accelerated inventory tracking by 40% through custom-built tooling. Skilled in secure real-time architectures (WebRTC, JWT, encryption) and conversational AI systems, with enterprise experience remediating vulnerabilities across Java and React.js stacks.

CORE TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++, SQL

Frontend & Mobile: React.js, React Native, Next.js, Three.js, Redux, Context API, HTML5, CSS3/SASS, Material UI, Bootstrap

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL, WebSockets, WebRTC

Databases: MongoDB, MySQL, Redis, ChromaDB

Cloud & DevOps: Microsoft Azure, Azure DevOps (CI/CD Pipelines), Docker, Kubernetes, GitHub Actions

AI/ML: LLM Integration (Grok), RAG Pipelines, TensorFlow, PyTorch, Hugging Face Transformers, OpenCV, scikit-learn

Security: JWT, Encryption, Secure Coding, Vulnerability Remediation

Practices & Tools: Agile/Scrum, TDD, Jest, React Testing Library, Git, System Design

PROFESSIONAL EXPERIENCE

Tech Mahindra

Jun 2025 – Present

Software Development Engineer – Software Developer

- **Remediated** enterprise-scale security vulnerabilities across Java backend and React.js frontend systems, resolving issues surfaced by audits, automated scans, and compliance reviews.
- **Hardened** platform security by implementing input validation, authentication/authorization improvements, and dependency-vulnerability fixes, strengthening compliance posture across production applications.

Renambal Technology Pvt Ltd

Oct 2022 – Nov 2024

Software Development Engineer – Application Developer, AI Products R&D

- **Cut API latency by 50%** leading full-stack development of a sound-box tracking and analytics platform (React, React Native, Node.js, MongoDB), through schema optimization and caching.
- **Boosted inventory-tracking speed by 40%** and reduced manual errors by building a custom React barcode scanner used across field operations.
- **Engineered a WebRTC-based Video KYC solution** in React Native, enabling encrypted, real-time identity verification across devices.
- **Delivered 3 full-stack applications for the Kaasu finance platform** — admin panel, customer app, and staff app — owning frontend, backend, and API design end-to-end.
- **Built a real-time AI interview platform** with a lip-synced 3D avatar (Three.js) that interviews candidates for any role — converting speech to text, generating responses via Grok LLM, and returning voice replies synced to visemes in real time.
- **Engineered a browser-based code editor from scratch** to power live coding rounds inside the AI interview platform, enabling real-time code execution and evaluation.

MakeEasyFilings

Aug 2021 – Sep 2022

Web Developer – React JS Developer

- **Shipped a production website end-to-end**, meeting all functional, security, performance, and accessibility benchmarks pre-launch.
- **Built responsive, accessible UI components** with React.js, Material UI, and SASS, ensuring cross-platform compatibility.
- **Improved application stability** through continuous debugging, refactoring, and performance tuning.

INDEPENDENT PROJECTS

Automated News Video Generation Pipeline (Python, OpenVoice TTS, Whisper STT, Wav2Lip, OpenCV)

- Built an end-to-end pipeline that scrapes tech news, generates narration, and renders a lip-synced avatar with automated background removal.

Automated Object Detection Training System (YOLOv8, Ultralytics)

- Built a self-annotating pipeline that scrapes and labels images, fine-tunes YOLOv8, and deploys the model for live object detection.

EDUCATION

Bachelor of Science, Computer Science

Jun 2019 – Jul 2022

University of Madras

ADDITIONAL INFORMATION

Certifications: Web Development (Udemy), Machine Learning & Deep Learning (Udemy)

Languages: English, Malayalam, Tamil, Hindi
